NDIANA BICYCLE COMPANY, INDIANAPOLIS, INDIANA

The Pecos Valley

OFFERS unequaled advantages to the farmer, fruit grower, live stock rulser, dairyman, bee-keeper, and to the home-seeker generally.

The soil of the Peces Valley is of high average fertility, and under irrigation produces bountiful crops of most of the grasses, grains, vegetables, berries and fruits of the temperate and some of those of the semi-tropical zone. In such fruits as the peach, pear, plum, grape, prune, apricot, nectarine, cherry, quince, etc., the Valley will dispute for the pre-eminence with California; while competent, authority pronounces its upper portions in particular the finest apple country in the world.

Enormous yields of such forage crops as alfalfa, sorghum and figyptian corn make the feeding of cattle and sheep and the raising and fattening of hogs a very profitable occupation.

The cultivation of canalgre—a tanning material of great value—is becoming an important industry in the Pecos Valley, a home market having been afforded for all that can be raised, at a price yielding a handsome profit.

ing a handsome profit.

The climate of the Pecos Valley has no superior in the United states, being pre-eminently healthful and health restoring.

Lands with perpetual water-rights are for sale at low prices and on easy terms. The water supply of the Pecos Valley has no equal in all the arid region for constancy and reliability; and this, with the superb climate, productive soil and the facilities afforded by the railway which extends through the Valley's entire length, will cause these lands to enjoy a constant, and at times a rapid in crease in value.

The recent completion of the Pecos Valley Railway to Roswell will cause the more rapid settlement and development of the upper portions of the Valley, including the rich Felir section. The Company has recer 'y purchased inney of the older improved farms about Roswell, and has now for sale land to meet the wants of all-raw lands, partially improved lands, as well as farms with houses, orchards and fields of alfaifa and other crops. In the vicinity of Roswell several pieces of land have tren divided into five and ten acre tracis, suitable for orchards and truck farms in connection with suburban homes. Certain of these tracts are being planted to orchards, and will be cultivated and cared for by the Company for three years, at the end of which period they will be handed over to the purchasers. Write for pamphlet fully describing the terms and conditions on which these several classes of tracts are sold.

Address, PECOS IRRIGATION & IMPROVEMENT CO., Eddy, N. M.
